Colloids and Surfaces
A: Physicochemical and Engineering Aspects 89 (1994) 290–291

COLLOIDS AND SURFACES A

Subject Index

Absolute dissociation constant, 103
Acid–base, 253
Acid–base reactions, 103
Acrylic polymers, 269
Adsorption, 1
Alkanes, 169
Amine adsorption, 193
Amine desorption, 205
Apparent dissociation constant, 103
Aqueous film recedence, 193, 205
Aqueous liquids, 213
Autophobic film, 145
Axisymmetric drop shape analysis, 169

Binding, 45
Binding isotherm, 37

Carboxymethyl cellulose, 59
Cationic surfactant, 145
Cationic surfactants, 59
Change-of-phase kinetics 89
Chemisorption, 71
Clapeyron equation, 89
Colloidal stabilization, 277
Complexing agents, 253
Contact angle, 89, 109, 117, 133, 157, 181, 263
Contact angle hysteresis, 109
Contact angles, 193
Coumarin, 37

Dewetting, 97
Dewetting glass, 193, 205
Dewetting model, 193
Dewetting paraffin, 193, 205
Diffusion, 213
Dynamic contact angle, 263
Dynamic wetting, 263

Electron donicity, 241, 253
End-functionalized polystyrene, 283
Endocytosis, 45
Equilibration time, 45

Film, 97
Flocculation, 241, 253
Forced spreading, 89
Fouling, 15
Fowkes' surface tension components, 181

Glass transition, 269
Goethite, 1

High pressure, 169
Hydrophilic force, 253
Hydrophilicity, 241
Hydrophobic force, 253
Hydrophobicity, 241
Hydrophobic polymer, 277
Hysteresis, 117, 133

Ink jet inks, 213
Interactions, 59
Interfacial dissociation constant, 103
Interfacial tension, 169
Inverted core-shell synthesis, 23

Kelvin equation, 89
Kozeny–Carman equation, 15

Latex particle, 23
Lead sulfide, 71
Liposome uptake, 45
Liquid displacement, 157
Liquid films, 79
Luminescence, 37

Membrane filtration, 15
Metastability, 97
Methacrylic acid repartition, 23
Microfiltration, 15

Nafion, 37
Natural organic matter, 1
Non-equilibrium absorption, 205

Paper, 213
Phase equilibria, 59
Phase rule, 181
Phase separation, 227
Plurivalent counterions, 241
Poly(dimethylsiloxane), 263
Polymer brushes, 283
Polymer orientation, 277
Porous structures, 213
ζ-Potential, 241, 253
Precursing film, 145
Pressure coefficient of interfacial tension, 169
Protein adsorption, 15

Repeptization, 253
$Ru(bpy)_3^{2+}$, 37
Rupture, 97

Scaling model, 283
Spinodal decomposition, 97, 227
Spreading kinetics, 79
Spreading model, 79
Spreading rates, 79
Spreading tension, 157
Surface analysis, 23
Surface exchange, 283
Surface forces, 283
Surface heterogeneity, 117, 133
Surface pressure, 157
Surface rigidity, 269
Surface tension, 59, 79
Surface tension of solids, 181

Thin liquid film, 145

Vapour adsorption, 157

Wetting, 117, 133, 145, 227, 263, 269
Wetting films, 157
Wilhelmy method, 117, 133
Wilhelmy plate, 269

Xanthate, 71

Young's equation, 109
